Permanent Partial Disability – Monetary Benefits – Leg Injuries – Employee Returned to Work for Pre-Injury Employer ...	36

Permanent Partial Disability – Medical Benefits/Expenses – Leg Injuries – Employee Returned to Work for Pre-Injury Employer ...	37
Permanent Partial Impairment – Leg Injuries – Employee Did Not Return to Work for Pre-Injury Employer ...	38
Percentage Awarded for Permanent Partial Disability – Leg Injuries – Employee Did Not Return to Work for Pre-Injury Employer ...	39
Average Permanent Partial Disability Multipliers – Leg Injuries – Employee Did Not Return to Work for Pre-Injury Employer ...	40
Permanent Partial Disability – Monetary Benefits – Leg Injuries – Employee Did Not Return to Work for Pre-Injury Employer ...	41
Permanent Partial Disability – Medical Benefits/Expenses – Leg Injuries – Employee Did Not Return to Work for Pre-Injury Employer ...	42
Judicial District Summaries ...	43

Introduction

A report of 2012 closed case Tennessee workers' compensation data was published in August, 2013. The tables presented on the following pages are a continuation of that report. The background and methods remain the same and both reports present information from data provided by the Tennessee Department of Labor and Workforce Development gathered on SD-1 forms. This is merely a supplement to the previously published information, providing a series of tables containing judicial district information. Included at the beginning of the Statistical Supplement is the addition of the number of cases by county and judicial district. The supplement concludes with summary sheets for each judicial district. Means and percentages reported previously are summarized on one sheet for each judicial district, displaying data from calendar years 2004 to 2012. Average medical amounts for specific injury types (body as a whole, arm and leg) are not included on the judicial district summaries. One cautionary note about some of the data presented. If a mean stated for a specific judicial district appears inordinately high or low, please review the number of cases. The lower the number of cases, the greater impact a high or low amount will have on a given variable. This is particularly evident in looking at arm and leg injury cases where the injured worker was not returned to work. An unexpectedly low or high amount may not indicate usual practices in those instances.

Number of Closed Cases by County and District – SD-1 Cases compared to AOC Listed Cases
