Judicial District Summaries ...43

Introduction

A report of 2008 closed case Tennessee workers' compensation data was published in August of 2009. The tables presented on the following pages are a continuation of that report. The background and methods remain the same and both reports present information from data provided by the Tennessee Department of Labor and Workforce Development gathered on SD-1 forms. This is merely a supplement to the previously published information, providing a series of tables containing judicial district information. Included at the beginning of the Statistical Supplement is the addition of the number of cases by county and judicial district. Over time, the percent of workers' compensation cases as reported with SD-1 data compared to the number per county reported by the Administrative Office of the Courts has increased. This would give the appearance of a more complete data set, however that is not the case. For 2008 data, for the first time, there are more cases reported using SD-1 data than AOC data. This is due to the increased utilization of the Department of Labor and Workforce Development for the approval of settlements. The first table listing counties by judicial district reflects that.

The supplement concludes with summary sheets for each judicial district. Means and percentages reported previously are summarized on one sheet for each judicial district, displaying data from calendar years 2004 to 2008. Average medical amounts for specific injury types (body as a whole, arm and leg) are not included on the judicial district summaries. One cautionary note about some of the data presented. If a mean stated for a specific judicial district appears inordinately high or low, please review the number of cases. The lower the number of cases, the greater impact a high or low amount will have on a given variable. This is particularly evident in looking at arm and leg injury cases where the injured worker was not returned to work. An unexpectedly low or high amount may not indicate usual practices in those instances.

Number of Closed Cases by County and District – SD-1 Cases compared to AOC Listed Cases
