- Improvements in economic fundamentals in the US and confidence that the Federal Reserve can taper while maintaining low rates through forward guidance led to broad increases in the major indices during the fourth quarter. This led to a 10.5% rise in the S&P 500 total return index in the fourth quarter, despite fears over policy uncertainty during the US government shutdown.
- Sentiment also improved for emerging market equities on aggregate. The MSCI EM Net Return Index rose 1.8% during the fourth quarter.
- In the Eurozone, the European Central Bank cut interest rates 25 bps to 0.25% as a result of weakening inflation expectations. Improved sentiment and loose monetary policy helped to lift Europe ex-UK in the fourth quarter, where equities rose 8.1%. The euro rose 1.8% against the dollar in the fourth quarter, driven by strong economic fundamentals.
- The yen fell 6.7% in the fourth quarter as monetary easing in the form of Abenomics continued.
- The State Street Investor Confidence Index® (ICI) measures risk appetite by analyzing buying and selling patterns of institutional investors. With confidence declining among North American institutions, the Global ICI fell 5.4 points during the quarter to 95.9 in December and still remains below the neutral level of 100.
- For the period ending 12/31/2013, the one-quarter returns for, respectively, the NAREIT Equity index and the NCREIF Property index (one-quarter lag), were -0.7% and 2.6%; one-year, 2.5% and 11.0%; three-year, 9.4% and 12.7%; and five-year, 16.5% and 3.4%.
- Preliminary results for 2013 indicate that US commercial real estate witnessed increased demand across all property sectors; this demand was driven by increasing employment, the recovery of the housing markets, the strong stock markets and a US economy picking up speed. Supply of new commercial real estate continued to be constrained.
- At the same time, REIT prices in the US were impacted by the increase in Treasury yields and an expectation that interest rates will continue to rise with the tapering of the quantitative easing program of the Fed.
