

## Important Information Regarding Workers' Compensation Pharmacy Benefits

Effective **03/01/18**, the State of Tennessee has partnered with CorVel Corporation and CVS Caremark to provide pharmacy benefits related to your workers' compensation injury claim.

Below is a sample of the pharmacy identification card you will be receiving. Bring this card to your pharmacy to fill medications prescribed by your treating physician. Be sure to use this card for each prescription so you can avoid any out-of-pocket expenses and requests for reimbursement. You will be receiving your new prescription card in the mail within the last week of February. This card will replace any previous pharmacy cards related to your workers' compensation injury.

Included with your card will be a list of participating pharmacies. These will include most national chains and independent pharmacies in your area. Simply present your card with the prescription(s) for your workers' compensation injury to any participating pharmacy. **Do not use the card for other prescriptions that are not related to your workers' compensation claim.**

CorVel also offers convenient home delivery through Caremark. Current mail order users will be contacted to set up new deliveries via Caremark Home Delivery. If you do not currently utilize mail order but would like to, please call CorVel, 800-563-8438, to speak with our Mail Order Department.

Please direct all inquiries from you and your pharmacist to CorVel Customer Service at **800-563-8438**.

Sincerely,

The State of Tennessee

### Sample Workers' Compensation Pharmacy Card

Use this card only for prescriptions related to the specific date of injury indicated as the last eight (8) digits of our identification number.

Please call CorVel Customer Service at **(800) 563-8438** with any questions.
